

Providing 3-Dimensions Of Service

Dependability • Dedication • Diversity

NAVAL/MARINE SERVICES

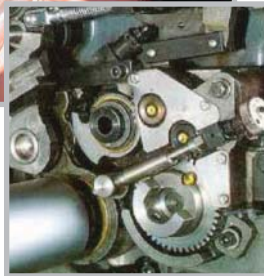

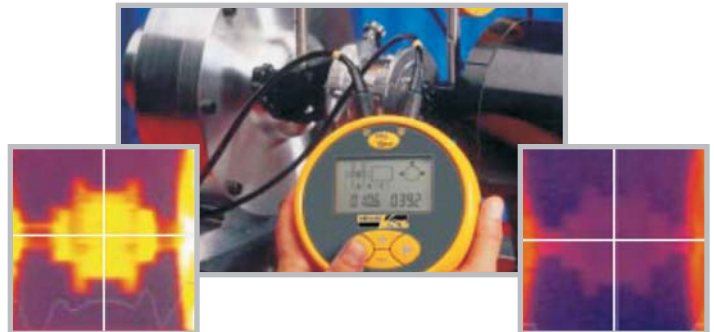

Magnetech Industrial Services will keep your business afloat through our extensive service offerings. From **Dry Ice Cleaning** to **Electrical System Services** and from **Propulsion and Power Service** to **Preventive Maintenance**, Magnetech provides fast, cost effective solutions to help you avoid costly downtime. We specialize in solving your equipment problems - on time, to specifications and within budget.

Preventive/Predictive Maintenance

Breakdowns and failures cause costly unscheduled downtime. Magnetech Industrial Services provides a comprehensive predictive/preventive maintenance program that can greatly reduce the threat of downtime. Our engineers and state-of-the-art equipment can detect problems and repair them prior to a failure.

Services offered as packages or stand alone options include:

- Vibration Analysis
- Laser Shaft Alignment
- Infrared Thermal Imaging
- Oil Analysis
- PdMA Motor Circuit Evaluation (MCE™)
- PdMA Emax™ Testing
- Ultrasonic Examination
- Physical Inspections

Dry Ice Blast Cleaning

Dry Ice Blast Cleaning uses CO₂ pellets to provide an environmentally safe and superior clean from solid and malleable contaminants.

- Removes paint, oil, grease, asphalt, tar, decals, soot, dirt, ink, resins, adhesives and organic materials, such as mold, mildew and algae
- Retards re-growth of bacteria, fungus and organic matter
- Can be used on delicate electrical components or to remove thick layers of contaminants on industrial equipment
- Leaves behind a clean, dry, undamaged surface

NAVAL/MARINE SERVICES

Electrical System & Component Services

To meet your needs, Magnetech offers specific levels of low and medium voltage services to help keep your vessel equipment in prime, cost efficient operating condition.

Our service capabilities include:

- Switchgear cleaning and replacement
- On-site preventive maintenance
- Recondition and refurbishment services
- Breaker and relay testing and troubleshooting
- Remanufactured circuit breakers
- Needs assessment
- Breaker parts and components
- Engineering services
- Turnkey switchgear/circuit breaker upgrades
- Low and medium voltage retrofit, clean and test
- High voltage field services available
- Motor Control Center (MCC) Retrofit

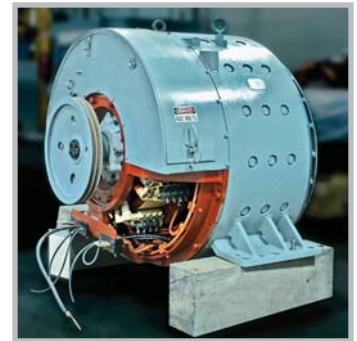

Propulsion & Power Services

Magnetech Industrial Services offers comprehensive, single source responsibility for all brands and vintages of rotating electrical equipment. Whether you need an emergency repair to get back into production, equipment remanufactured to better than new condition, or advance warning of impending equipment failure, we offer complete support.

We offer the following power solutions:

- Electric motor repair
- Fan and housing exhaust system repair
- Generator overhaul
- Pump repair and rebuild
- Power generation services
- Turbine services
- In-shop and On-site balancing
- Field services

Whether In-Shop or On-Site, Magnetech has **several locations** to keep your business afloat reaching the **Gulf Coast, Great Lakes, Pacific Coast** and anywhere in between.
