

*Our field service technicians and engineers can visually inspect and evaluate your equipment without disassembling it, thus reducing your downtime and minimizing lost productivity.*

## **Fast, Cost Effective Solutions**

*We're Ready to Help You Avoid Costly Downtime*

Magnetech specializes in solving your equipment problems on time, to specification, and within budget.

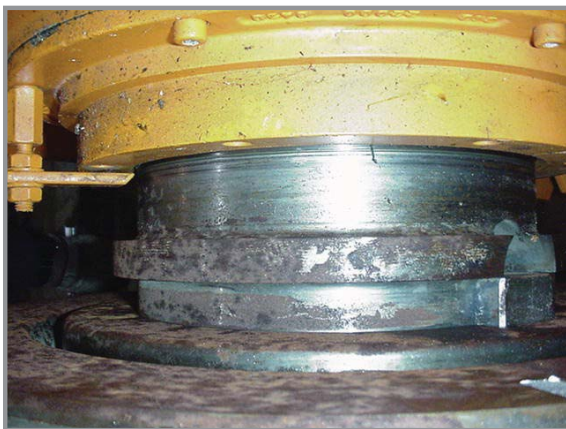

*Coil Inspection*

Using state of the art borescope equipment, we can visually inspect any piece of equipment in which the line of sight is broken, but access to the area is available.

With the most advanced digital imaging and measurement capabilities available, the borescope can be used to perform internal inspections on a wide range of applications.

## **Remote Visual Inspection Services**

Need other equipment or services? We can handle all of your rotating equipment and power system needs. For quality service at your site or in one of our shops, call the Magnetech service pros.

*Coupling Inspection*
