

We provide solutions

MagneTrac® Asset Mgt.

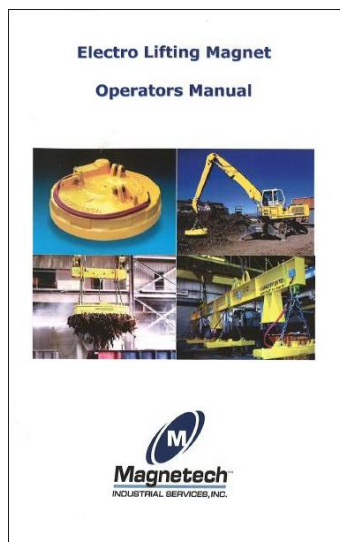

Client Type: Steel Manufacturer

Equipment Involved: All lifting magnets

Challenge: Customer had implemented their own reliability program to better manage their equipment while decreasing their downtime and repair costs. A short time later their magnet repair costs were out of control and hovering between \$225,000 and \$250,000 per year.

Solution: Implement MagneTrac® asset management program and magnet operator training

Project Scope: By partnering with Magnetech, implementing MagneTrac, and taking advantage of magnet operator training and many low to no cost recommendations discovered during the MagneTrac inspections, the customer dropped their annual magnet repair costs to approximately \$120,000 within the first year.
