

Magnetech can engineer and design custom magnets and magnet systems to meet customer's application requirements.

120" x 85" Scrap Magnet Custom Engineered for Magnetech Customer Increased Lifting Capacity of Previously Used Dual Magnets by 20%.

Custom spreader beam and magnets with PowerPro generator fitted to a Taylor Equipment loader.

Quality is Customary:

- On staff design engineers and magnet specialists
- Custom designed spreader beams
- Magnets and generators custom fitted to your facility and equipment
- Special voltages

An electro magnet lifting capacity is based on optimum conditions. Variables in the size, density, composition and arrangement of materials to be lifted or variables within the magnetic power system can affect lift performance. Material descriptions are based upon specifications for iron and steel scrap published by the Institute of Scrap Recycling Industries. Lifting capacities are based on an all day average per lift.
