

Magnetech
INDUSTRIAL SERVICES, INC.

We provide solutions

Emergency Magnet Rewind

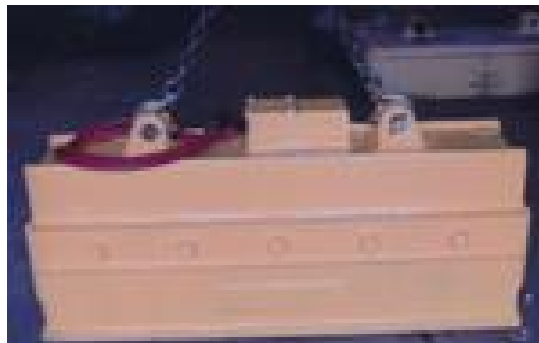

Client Type: Steel Manufacturer

Equipment Involved: Two hot-bottom, bi-pole magnets.

Challenge: Record-high summer temperatures had caused both production magnets to fail. Spare magnet was being used. If it failed, then the mill was down.

Solution: Repair critical, out-of-service magnets on emergency-time basis.

Project Scope: Pick up magnets from customer's Virginia mill, transport to Magnetech's Boardman, OH shop, rewind, and return to mill within one week.
