

Magnetech
INDUSTRIAL SERVICES, INC.

We provide solutions

Transformer Rewind

Client Type: Military

Equipment Involved: GE Transformer, circular disk type, oil filled

Challenge: Provide all labor, material, equipment and transportation necessary to rewind transformer to customer specifications.

Solution: Rewind all windings to match original design, thermally upgrade conductor, new oil insulation with full vacuum.

Project Scope: Rewind transformer to original design (circular disk) , thermally upgrade conductor, replace tap changer, replace all bushings, gaskets, cooling fan equipment and controls, gauges, control wiring, mechanical pressure relief device. Transport and re-install, perform field acceptance testing including oil quality.
